ADMINISTRATIVE

Enclosed for each field division is one copy of an affidavit for above described search warrants. This document remains sealed and is not to be disseminated outside the FBI at this time. This affidavit remains sealed at both the SDNY, Manhattan and the EDNY, Brooklyn, NY. It is being disseminated solely for information purposes.

ARMED AND DANGEROUS.

REVOLUTIONARY GROUP ADVOCATES ARMED REBELLION AND APPEARS TO HAVE WITHIN ITS STRUCTURE A "MILITARY FRACTION."
Provisional Party of Communists (PPC),
also known as (aka)
Eastern Service Workers
Association (ESWA);
National Labor Federation (NATLFED);
Domestic Security/Terrorism

The true name of the organization is the "Provisional Party of Communists," and is referred to by members as the Provisional Party (It has no connection to the Communist Party, USA (CPUSA). The Provisional Party is considered "secret" and operates publicly under the cover of the NATLFED. The NATLFED acts as an umbrella organization for approximately 40 groups across the country. The group was founded in approximately 1971 by a group of individuals including [fourth person] and an unknown

Fourth person. The party was founded to be a revolutionary communist party whose goal is that of seizing control of the United States Government. This take over according to source information was to occur February 18-19, 1984, and is referred to be members as the "Proscenium Tactic." The party is divided into several cells, which they call "Fractions" with one of these fractions being called the "Military Fraction" (MF). The MF requires a minimum of one year full time membership complete with political education, training and evaluation. Several sources have reported that the MF participates in military drills. It was also reported by sources that weapons were stored at 1107 Carroll Street, Brooklyn, New York.

Briefly, individuals are recruited to donate time, money and work as a volunteer for a particular charitable organization controlled by the group (E.G. persons would be asked to donate...
time and become volunteers for the ESWA, which is supposedly a charitable, non-profit organization, whose goal is to help migrant or low class farm workers out on Long Island and other parts of the New York metropolitan area). This first stage is called "Tabular Volunteer." The Tabular Volunteer donates money, runs errands, makes telephone calls, etcetera for one of the public organizations operated by full members of the group. Within three months to one year, this volunteer, after evolution, may be upgraded to "Viable Volunteer." At this level the person can be counted on to volunteer whatever is requested. Also, at this stage, the person is asked to attend the NLC. The NLC is not so much as a place but rather a term used for meetings held in Brooklyn at Carroll Street or other locations (usually an auditorium donated for use by a school or church). At these meetings, the Viable Volunteer usually becomes aware, to varying degrees, of the Marxist or revolutionary aspect of the organization. The next stage is called "Tabular Cadre." At this stage, the volunteer learns of the "Statement of Principles," assigned sponsors and given regular reading assignments. The person gradually learns that the organizers are "professional revolutionaries." The fourth step is that of "Viable Cadre." At this step the member is fully committed to the revolution. After one year membership as a Viable Cadre, the individual reaches the final stage, which is a "Full Member" or "Interior Cadre."

Regarding captioned group the leader is described as follows:

Background on

During 1970, the subject was one of the operators of the "Little Red Bookstore, " 3191 Mission Street, San Francisco,

California, and was reportedly of the Liberation Army
Revolutionary Group Organization (LARGO). LARGO, in March, 1970,
publicly declared a state of revolution to begin on March 15,
1970, in Northern California, by mailing letters to various
Northern California County officials. A former San Francisco
source had reported in November, 1970, that participated
in firearms training in Chico, California,

On May 17, 1973, Suffolk County Police Department (SCPD)
advised that about January, 1973, SCPD received information from
a source that there were unregistered guns located at
1735 Montauk Highway, Bellport, New York, which is a residence
maintained by the Eastern Farm Workers Association. SCPD
executed a search warrant at this location and confiscated two
handguns and ammunition. Through subsequent investigation, it
was determined one gun was registered to the subject.

In late 1982, reportedly displayed and offered
for sale numerous weapons to leaders of the Texas Farm Workers
Union who were in the New York area visiting during this
time.

Also at this period of time (1971), in the San Francisco
Bay Area, there existed an umbrella radical movement called The
Bay Area Radical Union. This group broke up and its membership
gravitated to various other activist organizations ranging from
Anti-Vietnam War protesters to the more radical and violent
groups such as The Venceremos organization and the Symbionese
Liberation Army. independent group
knows as LARGO (Liberation Army Revolution Group Organization).
LARGO distributed flyers announcing that on March 11, 1971,
LARGO would launch an armed revolution and take over key
installations, including military bases in northern California.
Shortly before this date, LARGO was disbanded.

Thereafter moved to the East Coast and operating from the Long Island, New York area achieved a measure of success in founding The Eastern Farm Workers Association. At this point he had a passing relationship with Caesar Chavez's United Farm Workers. This relationship was short-lived when Chavez recognized that was a liability and he was, in fact, in competition

Since 1977, has operated independently, for the most part, and developed his organization to the point it has reached at this present time.

NATLFED (the Organization) uses the same or similar terms interchangeably. This, coupled with the practice of front groups temporarily acting as parent groups and vice-versa, allows the Organization to present itself in a more sophisticated, complex, and even confusing structure than that which really exists.

Simply, the Organization is established as a pyramid structure. The apex of the pyramid being the The Communist Party USA Provisional Wing. Directly under this is NATLFED. Pyramiding out from NATLFED are at least three major groups: The Eastern Farm Workers Association, The California Homemakers Association and The Western Service Workers. In turn these major groups have spawned any number of smaller groups or associations such as: Eastern Farm Work Association, Western Service Workers, Eastern Service Workers, California Homemakers Association, Coalition for Concerned Medical Professionals, Coalition for Concerned Legal Professionals, Communist Party USA Provisional Wing.

The personnel in the Organization are highly structured and categorized. There are basically four major levels of
Provisional Party of Communists (PPC),
also known as (aka)
Eastern Service Workers
Association (ESWA);
National Labor Federation (NATLFED);
Domestic Security/Terrorism personnel. These levels can be equated with the depth or intensity of involvement an individual has in the Organization.

Theoretically for the most part the technique of following a cell-like structure is employed. Individuals work within their cell knowing the identity of their cell leader but not necessarily knowing the identity of other cells and/or cell leaders. It is definite Organizational policy that members at all levels operate on a "need to know" basis.

In actual practice members are obviously aware of the identities of other cells, cell leaders, personnel, groups, activities, etc.

**Level I - Inner Party - Entity**

[ ] governs the entire Organization through the Inner Party - Entity at its headquarters at 1107 Carroll Street, Brooklyn, New York. This Inner Party - Entity, also known as the Inner Circle or The Cave is comprised of no more than forty individuals, both male and female. A more realistic figure may be twenty-five or so. Within this entity exists the "Military Fraction."

**Level II - Cadres**

Cadres are self-contained units comprised of two classes of volunteers, tabular and viable. Cadres are under the command of captains.

Individuals, in whatever classification of cadre duty, can be considered hard-core full-time members of the Organization. Most have given up jobs, school, family, avocations and other ties in order to commit all of their energies to the Organization.
Provisional Party of Communists (PPC), also known as (aka)
Eastern Service Workers Association (ESWA);
National Labor Federation (NATLFED);
Domestic Security/Terrorism Cadre members consider themselves para-military and are reportedly trained in the latest weapons, particularly highly technical US Military ordnance. They are definitely involved in intrigues and clandestine activities. However, most of these intrigues have an ersatz or frankly fantastic basis. Most of their productive activities center around generating quantities of paperwork, all of which is produced in triplicate (one copy always being forwarded to POPS which stands for Permanent Operations Parentis). Reports are filed on community activities, academics and individuals they feel subversive to their cause.

Door-to-door street canvassing, called "Bucket Drives" are conducted as well. These drives are to solicit funds, bring in new members, and spread their ideology. Benefit allocations (as discussed in another section of this report) is conducted by Cadres as well. As stated, other than captains, volunteers involved in Cadre are classified as tabular of viable.

Tabular

A Tabular is an individual recently joining the Cadre group. He or she is assigned two sponsors who act as surrogate parents and instruct the individual down the path of true communism. Tabulars are placed on a one-year probationary period during which time (in addition to their regular duties) they participate in Political Science classes (Marxism), Labor History, Political Economy, Personality of Communist Leaders and the History of the Parenti Organization.

After the probationary year, a committee of four, including a commisar, votes on whether or not the individual will be promoted to Viable status. The commisar can veto the decision of the other three committee members to promote the Tabular.
Provisional Party of Communists (PPC), also known as (aka) Eastern Service Workers Association (ESWA); National Labor Federation (NATLFED); Domestic Security/Terrorism

Viable

Once elected to the status of Viable, the individual is considered to be a full-fledged, completely dedicated member of the Organization. The individual can think only through the frame of reference and dogma of the Organization and will never verbally or even internally question the policies or the actions of the Organization. No complaints are tolerated from the Viable. All worldly possessions are assigned over to the Organization. Viable members aspire to eventually be promoted to the Inner-Party Level.

Level III - Operations

Operations are under the control and leadership of Operation Managers. An Operation Section will have volunteers and full-time personnel assigned to it. The full-time personnel are administrative assistants and office workers. These individuals are usually Cadre members. The volunteers are part-time members usually comprised of college students, housewives, young professional people and naive social activists. As in the Cadre, the volunteers are divided into two classifications. Once again, the terms Tabular and Viable are used.

Tabular

These are the newest volunteers who are enticed into donating a few hours per week for various, seemingly worthy causes, such as The Mutual Benefits Program. Generally they participate in food and bucket drives, canvass for new members, and do some telephone procurement work. There is little pressure on these individuals. They come and go from the Organization as they please and maintain strong ties with the outside world.
Provisional Party of Communists (PPC),
also known as (aka)
Eastern Service Workers
Association (ESWA);
National Labor Federation (NATLFED);
Domestic Security/Terrorism

Viable

Viable members are carefully picked for promotion from Tabular status. Once being accepted into this status the individual must schedule a substantial portion of his or her time to group activities. Constant pressure is placed on increasing commitment to the point where outside life and organization life come into conflict. Frequently leaders synthesize a breaking point in the individual. If this breaking point occurs, the individual is taken aside for analysis. It is during this analysis that the individual is evaluated and, if desired, pushed virtually over the emotional brink into full-time commitment to the Organization. A technique used as a catharsis to ease the conflict is achieved by inviting the individual to a "secret meeting" where the history and goals of the Organization are revealed, portraying the movement as a romantic, successful, long-established activist group that is well on the way to establishing the New Social Order.

Level IV - Members

The Organization purports to have, and can produce, impressive lists of thousands and even tens of thousands of supporting members. In reality, these lists are compiled by people who are unwittingly have signed petitions and other documents during various canvassing drives.

Finally, prior to the above described search warrants
being executed, the Behavioral Scient Unit, Federal Bureau of
Investigation Headquarters, did an analysis of the captioned
group, based on information available, and its findings are as
follows:

This group is leftist in its orientation, and extremist
in their views concerning the government of the United States.
The group is highly organized and very militaristic. It also
appears to be operating with tactics similar to many cults, in

terms of the way in which this group recruits its members. That is, it will take in individuals who are "inadequate" and who are considered to be outcasts, and it will show them acceptance, warmth and love to the degree which they have not received in other areas of their life.

The characteristics of the leader of this group fit those of the leadership of these "left wing" extremist groups. In fact, their planning, interigence and ideology are all extremely characteristic with the exception of the fact that this group has apparently actually acquired an ability and degree of organization to execute the far flung plans of its leadership. This is unusual in groups not supported by foreign governments (if that is the case).

It is characteristic in groups like this that the leader is generally the ideologue. He or she is intelligent, capable of intricate planning, and minute detail; however, they generally remain very vague concerning the actual execution of those plans. They will have the absolute appearance of authority, but may actually "share" authority at times with whoever is helping execute their plans. The leader will often appear quite meek when confronted by established authorities, but will extract their "revenge" later. They can be dangerous if they have, or think they have, the upper hand in a confrontation.

The leader of this particular group, [Name Redacted] has all the characteristics of the above mentioned leader. In addition to that, he appears to have the same need for code names, fancy acronyms and special double meaning type of verbage, which is often used by these groups. For example, the name [Name Redacted] uses as an alias, and its similarity to [Name Redacted] This proclivity for names and elaborate structures is further shown in the setup of the PPC and this

secret military "fractions." It is very likely that the secret military "fractions" have all sorts of rituals and rights of passage for each level of rank. Further, the extensive keeping or records, notes and journals, double checking on everyone and so forth, is also characteristic of the type of leadership of degree of apparent sophistication and control which this group has exhibited over its membership. Neither is it usual to maintain such a low profile for the military "fraction." There would very likely be "practice missions," which this group would engage upon. It may be well known to screen some unexplained bombings and/or assassinations type killings around the United States.

This document is being disseminated to the United States Attorney's Office, Eastern District of New York, for a definitive legal opinion as to specific steps to be taken in regard to violations of federal law. In addition, copies are being disseminated to Alcohol, Tobacco and Firearms (ATF); US Secret Service (USSS); Internal Revenue Service (IRS); New York City Police Department, Intelligence; and US Army, Military Intelligence to insure that any/all substantiative violations are addressed.
